My strength:  
My strength is my skills what I have and my knowledge which will lead me in achieving my goal. Sheerness to learn something at one go is most important to excel yourself for progress in life with positive attitude. Once I met a professor from New york Univeesity said, never let failure to get dominated upon you and you are winner. This theory has become a part of my life.

My Weakness:  
I lacked planning skills. I always did thing at one go. sometime forget to do something which is important. Since I have recognized it, I have started to plan it in notes and make sure it is accomplished at the end of the day.

I feel, whenever I am engaged in the successful accomplishment of any work, I focus on that work until and unless it completes.. I become engrossed in that work without distracting myself to other jobs. This is my strength for the work completes with less faults and with greater accuracy.

Also this is my weakness, since I am engrossed in the work until its completion, other works are left pending. I am working on it and I a confident enough that I will resolve the negative effects.
